

### **F-150 Emblem Inlays-**

The inlays come with a clear application tape, so you can easily see where you want to place the letters. Use this tape to stick the decals on your badges, do not touch the underside of the actual decal. Once in place, you can remove the clear tape from the top. During installation, we recommend that you install one letter at a time. You may need to cut around the letters to apply them individually. Remember, patience is the key when installing decals. (Do not use any sort of "Wet method" of installation on the inlays, as it doesn't work like the overlays do.)

Thank you! We hope you enjoy your custom emblems!!
